

Channeling

Many people are starting to ask, what is channeling. Just by asking, you are opening to an exciting journey of direct knowing. It's not mysterious but a way of tapping into your intuition which is your natural state of being something in which you were born with. As you commit to pursuing the intuitive path "spiritual path" you will find yourself changing, you reach deeper into the richest source of information, yourself or your God Self...

Along the way you may need some assistance, someone who can intuitively guide you along your personal journey of self discovery. Channels are a wonderful source of information and inspiration.

Channeling is a means of access to intuition. It's an inner process an intuitive connection with a universal yet unseen source of information and insight. The channel partially or totally puts aside waking consciousness so that knowledge that lies beyond conscious awareness can flow freely into the mind and be conveyed through speaking or writing to others.

Some techniques used to transcend the conscious mind are called light trance channels. They simply surpass the superficial aspects of the ego and tap into a higher state of consciousness where there lies an impersonal reservoir of knowledge. No personality change is obvious and they converse normally.

There are conscious channels, where they do not appear to go into an altered state. They remain fully conscious and aware. Psychics are conscious channels.

Others are deep trance channels because they appear to fall asleep while they enter into an altered state of consciousness. Another personality or spiritual entity then emerges. These entities frequently possess distinct vocal qualities, mannerisms and personal characteristics from whom they channel...

When one channels they are not being possessed, these channels willingly allow entities to communicate through their bodies. Some people find it hard to believe in nonphysical entities. Like Angels or miracles, invisible sources of information require that you have faith. They ask you to believe in their existence without giving you tangible proof. They all have the same purpose, guiding the spiritual growth of people on earth.

Embarking on any new journey can be scary as well as exciting. These teachers, Angels or discarnate entities express great concern with human affairs on a grand scale. They compassionately give advice about ones spiritual growth. They tell listeners how to become more aware, more self responsible and more

open to the truths that lie within them. Perhaps more importantly they help you to access the power to create and influence the events in your life.

Because channels access higher spiritual dimensions they or the entities communicating through them can view or read each client's life from a broad perspective seemingly undaunted by the limitations of time and space and unclouded by the client's intellectual constraints or unconscious beliefs.

How does a person find a reliable channel? Mainly by referral. Other ways are through holistic magazines or centers. Ask questions before making an appointment. Use your intuition and feel if this person is right for you. Many Channels are capable of addressing any area of inquiry. Some specialize in spiritual matters, others opt for career guidance, health consultation, past life recall or mediumship.

Go with an open heart, feel the love that is there for you. It is the Angels wish for you to know the beauty of your soul.
